

VW

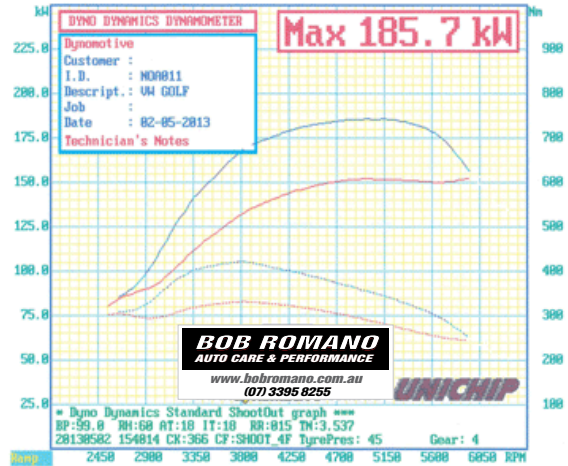

VW Scirocco 2012

This front wheel drive, 2.0l turbo petrol engine (Unichip Australia test vehicle) is producing an amazing 195.9kw at the front wheels. Starting from an impressive 157.6kw at the front wheels standard. With the Unichip fitted and custom Live Dyno Tuning the Factory power has been increased by 38.3kw or 24%! at the front wheels as measured by our Dyno Dynamics Dynamometer. The Torque increase is even more impressive going from 254nm standard to an incredible 380nm at the front wheels, that's an increase of 126nm or 50%! Giving this Scirocco unbeatable acceleration. Unichip is the Australian market leaders in performance enhancements for your VW Scirocco!

This 2013 Gold GTI made an awesome 155kw at the front wheels, (Intake fitted on before power run) After The tailor made turbo back exhaust was fitted in collaboration with the Unichip version Q+ and full custom dyno tune the VW Golf made an unbelievable 185.7fwkw! That's 20% more power or 35 more kw's at the wheels! There's 28% more torque at 3800rpm or an increase of 110nm!
