

## Holden

### VE V6 Holden Alloy tech 2009

This 2008 V6 Holden made a stock power of 142 rkww, after fitting a UnichipQ+, Full exhaust including headers and hi-flow cats, and an OTR Intake, the little v6 is now pulling a top end power of 171rwkw! That's a mid range to top end increase of 20%! Great combination, including the ability to correct the operation of the oxygen sensors, so no engine light....
