SKU: Suitable for Toyota Prado 1999 5VZ-FE 3400 24V

Short Description:

MODEL: Toyota Prado 1999 TOYOTA87 Q.

Description:

TOY75Q

After fitting and tuning a Unichip Q including a plug and play harness and an optional map select switch, this is now making a peak power of 94.1 kw at the wheels!

Power Results:

From 80.8kw at the wheels.

To 94.1 kw at the wheels.

Torque Results:

From: 190nm at the wheels.

To: 230nm qat the wheels.

How does the Unichip work with your 3.4lt Petrol Prado:

Fuel Control: As 99.99% of factory cars come tuned VERY RICH, it makes sense to lean the fuel mixtures back to a safe area that enables the car to make good power without wasting fuel. With the Unichip we can blend the fuel trims only were required to correct the mass production “errors” allowing the engine to run more efficiently and ultimately last longer, the extra power produced is just a bonus!!

Ignition Timing Control: As with fuel control factory cars come with the ignition timing a long way away from ideal. With the Unichip we can optimise the ignition timing across the entire rev range, with Unichip “LIVE” timing and fuel adjustments are possible, this is the only true way of determining the best possible timing and fuel setting at each load site. Ultimately this will give the car more power, more torque and greater fuel economy. If the owner chooses to run premium unleaded fuel we can set the tune to take full advantage of the higher quality fuel.

Options:

Map Select : This option enables the 5 map capability of the Unichip Q. This means you can access the 5 maps which can be tailored to your requirements. EG, High octane Map, low octane map, Standard Map, Immobiliser Map or even a race fuel map. Speak to your Authorised Unichip agent to tailor 5 tunes to suit your application.
